BEFORE ASSEMBLY

1. Find a clean, level place to begin the assembly of your product.
2. Verify that you have all listed parts as shown on the part list pages.

PLAYING INSTRUCTIONS

OBJECT OF THE GAME

Remove one block from any level of the tower except the top level, and then place the pulled block back to the top of the tower. The player who makes the tower topple lose.

SETUP

1. Find a firm and level surface. Caution: To protect the surface of play and extend the life of the blocks. It is recommended that the game is played on some type of firm mat. A gym mat or a blanket.
2. Stack the blocks in sets of three.
3. Stack each layer of three parallel blocks which should be rotated 90° along the horizontal axis from the previously layer.
4. Repeat Step 3 until all blocks are stacked.
5. The finished blocks tower will be 18 levels high. Before you play the game, make sure that the tower structure is sturdy. Use your hands or a flat object to smooth out all the sides. Make sure to push in any blocks that stick out .

OPTIONAL RULES

FAST PLAY

To make the game quicker and more exciting, you can limit each players turn to 30 seconds per move. As soon as a player removes his or her hand from the block, the 30 second clock should start.

The player can choose to wait 10 seconds to see if the tower will fall but that 10 seconds should count against the 30 seconds that player has to make a move. Use a stopwatch or egg timer to keep track of time.

YOUTH PLAY

An option to make the game easier for young players would be to allow a player to use both hands at one time . The player must be touching the same block and not use the other hand to steady the tower.

Another option would be to allow two players to work together on a team. The team can work on both sides of the tower pushing or pulling a block.
